

CAR BOOK RATINGS – 2005 MODELS

We thank Jack Gillis and *The Car Book* for permission to post its 2005 make-model safety ratings, which appear in the table below. The rating information is grouped by category of vehicle: Compact, Intermediate, Large, Minivan, Pickup (Compact), Pickup (Standard), Subcompact, SUV (Large), SUV (Midsize), SUV (Small). Vehicle make-model names appear within each category.

The rating information, from left to right, identifies the following:

- Test (government-performed crash test or tests);
- Car Book Rating (the car's crash test performance compared to all other models ever tested);
- Likelihood of Life-Threatening Injury (lower percentage is better);
- SSF (Static Stability Factor, which measures a vehicle's propensity to roll over –a lower figure is better), and
- Rollover Rating (based on the SSF).

Use your Acrobat Reader search tool, indicated by the binoculars icon, to find individual makes and models. You can also browse the entire list to find which vehicles are rated higher and lower in various categories.

Size Class	Vehicle	Test	Car Book Rating	Front Driver	Side Front Occupant	Front Passenger	Side Rear Passenger	SSF	Rollover Rating
Compact	Acura RSX	SSF						1.39	Low Risk
Compact	Acura RSX 2-dr.	FRONT	Very Good	9%		7%
